B. A choice tot of Segars always on hand.

Then again, there is the oppression of country customors. If one of them twees a note payable in Boston, and at maturity wishes it extended, he goes to the Bank and gets the bills for the payment. These he takes to the Scifotk and ecuquines for his note. The cierk or other officer says, this is not Boston marcy, we can't take it had at the case discount on the 5th of the but at 5 cents discount on the \$104, ich is but at 5 cents discount on the \$100 if it is before 10 o'clock and 8 cents per \$100 if later. Now we know that this is alone at the Merchants Bank, Providence, even when the note is owned, and sent to the Merchants for collection, by a Bank which keeps a permanent deposit there. And, again, the courtry banks are appressed in the matter of their collections, if more through the Merchants for the collections. the matter of their collections, if muce through the Merchants Bank. A part of their contract is to collect at part on Hosten, but you can rever get credit short of the second day after its maturity, and it is frequently three, and sometimes four days, Whan the bills to pay a note to a Boston merchant is in to the Suffolk, we never fell to have it marked second. herteant I off to the Eufolk, we never fail to have it marked against us on the very day. Why then the difference? Does it take so much mere this to credit, than to charge? But to return.

Where did the Suffolk derive all these

profits, if they have not been derived from this branch her of business? and what fully for the committee to bint at her willing ness to surrender this income | and, ness to surrender this income | and, before dismissing this very interesting point, to use, at the present, as it has been to her since 1821, we cannot but resert to the committee again, and thank them for the acknowledgment which has so constantly the state of the present of actnowledgment which has so constantly been charged, and as pertinacion-ly denied, that the policy of the Soffolk is to restrict the circulation of country money." If they mean anything when they conquire whether the country banks (alluting in those subscribing to the capital stack of the Bank of Manual Redemption), would increase their circulation, or keep has a readile to seed. Seriong to the capital stock of the Bank of Mutual Redemption,) would increase their circulation, or keep has specie to redeem it, they mean just this. Heretofore the Suffolk has pretended that, by dieir management solely was the country circulation extended; but now, when a purpose is to be gained, the truth is permitted to test cape, and the rebels charged with this very reasonable desire. The fact is, as every one acquainted with the subject knows, that what is called circulation is not always so, Just look at the amount of country mency redeemed at the Suffolk, and charged to the banks, but not received at the time of making their reports. This should be deducted, and would make a vast difference in the amount. It is different with the in the amount. It is different with the Boston banks. They clear daily, and consequently the amount of their circulation is much neater the truth, as the bilinices paid other banks in large bills cannot be larger in proportion than that of the large coun try banks. The circulation of the try banks. The error atton or the country banks (banks out of Hoston) with \$12,000, 000, is less than \$30,000 each, and as their capitals, we think will average \$208,000, it will be seen that if the whole was really in circulation, burthened as it is by the Suffolk expenses, it is nothing very extravarots expenses, and bears no comparison to the ben-gant, and bears no comparison to the ben-cht derived by the city banks on deposits, which we wish the committee to under-standaro no less liabilities than scientifican, standare no less habilities than carculation, and, as before stated, can be brought to bear with far more certainty, and dispatch than the former; and, if they really meant to make fair and manly comparison of the assets and liabilities of city and country institutions, this would not have been almost her averaged of

institutions, this would not have been altogether overlooked. We say that the country banks have a right to creend their circulation to the limit of the law, if they choose to do see, and it is impertinence in the committee to modifie with it in any way. What bushess is it to the city banks whether the country circulation be large or small, so long as they provided for it? and they always have provided for it quite as well as the city banks; and they always will, whether the banks; and they always will, whether the re-heming agent is the Brok of Mutual Re-demption or some other.

Now, with all the facts before them, do

the committee think that we have any cause of complaint? When all thus suffer will they inquire, "who are the disatistical? Is it strange that we seek a change?

One more remark before we close, " It

One more remark before we close. "It is a strious question," say the committee, properly be onging to the Hoston banks, "whether this system, which has worked for so many years, and drough such trying times as those years include, should be anteressarily distorted; and whether they are prepared to upheld this new institution; to, without the hearty old and co-operation of the banks in this city, it is evident that no institution can long austian itself in send of the banks in this city, it is evident that no institution can long sustain itself in such an undertaking, and its failure would involve the most serious consequences."

Who made Boston banks? and who clothed them with this supervision? We acknowledge no such pretence.

It is said that Mrs. Cyrus W. Field in truds applying to the courts for a legal set-tlement of the question whether her hasband to the country or to herself. Published every Morning-Sundays excepted, by GEORGE 4. HAMMOND, BOWOT AND PROPRIETOR, At 144 Thames St., corner of Frault,

WEDNESDAY WOR'G, Sept. 1, 1858 Pacific Raffrond - Again. Now that the Atlantic Telegraph has

been completed and Is in successful operation, so that the continents of America and of the Old World are brought within speak ing distance of each other, there is an additinual and powerful reason for the construction of the Pacific Railroad -- a work, the postponement and neglect of which, hither to, by our government, seems wholly indefensible.

As affording facilities for the rapid settle. ment and improvement of the Great West, between the Mississippi and the Rocky Mountains, and beyond those mountains, there is nothing that can at all compare with a substantial and well conducted railroad-one located in the best adapted route, and affording the means of freight and transit to all who desire it, at a reasonable charge.

As an efficient aid to the military defence and protection of the country, we see no possible way in which the public money can he so well invested, or likely to be productive of so much benefit-eertainly not, so long as we are exposed to any danger of Indian, Mornion or foreign wars-and some of these dangers are likely to last a long time. On the whole line of our Atlantic coast, we can at any time, by the aid of steam verrels, rapidly concentrate any needed military force, to repel invasion; while our Pacific and north western bordee in case of war, are left greatly exposed .--This ought not so to be, and the Pacific Railroad would afford the best and most available remedy. This fact alone, if there were no other reason, would amply justify the construction of the road by the general government.

But there is a th' d argument, and a potent one, why this great work should be at once begin, and pushed forward with all diligence to its completion. Not only do our numerous and increasing citizens in California, Oregon and Washington greatly need this line of communication opened with the Atlantic States, for their own personal and commercial purposes; but the new and most important era just inaugurated in Eastern Asia-the peace with China, and the opening of the trade of that vart country to the civilized world-renders the Pacific Hairmad a necessity. Chica and Japan both need it-the multitudinous islands of the Pacific need it-but the Atlantic States need it most of all.

The Reviewat Fort Adams. The Review; Drill and Exercise at Fort Adams, yesteiday, passed off very agreeably, and was witnessed by a large and respectable assemblage of ladies and gentlemen from this city, though not so many, doubtless as there would have been had there been an carlier notice. The day was one of the finest of the season.

The first act in the programme was the discharge of the heavy pieces, 32 pounders, on the walls, which was done with stunning on the walls, which was done with stunning effect. This was followed by a series of expecies by the Artillery in the park within the enclosure, embracing, among other things, several rounds from the four brass field pieces of the Company. Some twenty minutes or half an hour were passed in these exercises, cliciting the admiration of the speciators, when the party proceeded to the speciators, when the party proceeded to the least of the land of the companion of the companion of the companion of the companion of the speciators, when the party proceeded to the speciators about half a milescuth of the Party. Re onbt, about half a mile south of the Fort, to witness the most interesting exercise of the whole, the firing with shot and shell at a rarget. Arrived upon the ground, the Company formed in the park south of the Redoul t, where they performed a variety discontinuous and the control of the last four years in Kausas. To may the Redoult, where they performed a variety of evolutions, including several rounds of catridges from the brass field pieces. In these exercises the company showed great proficiency in military tactics. This was followed by the target practice with case shot and shell, in which curious men and shell, in which curious men and timid ladies were initiated into the first degree of military warfare. There were two targets, on the seashere, one ten hundred and the other four hundred yards from the hattery, and at these the arlikerymen aimed their pieces. The whist-ling of the shot and shell as they sped on their erranel of destruction, was suggestive of basile armies and hande fields and all looked to see one or both of the targets knowled "into the middle of next week." Some of the shot and shell struck the water, which manifested its indignation at the intrusion by leaping several feet skyward, and one buried itself in the ground near the furthest target, scattering the dirt in all directions as the shell exploded.

Gen. Pacz was on the ground, the observed of all observers. He is a fine looking man aboat live feet in height, thick set and apparently about 50 years of age. His Executioney was a calm spectator of the stene only now and then volunteering a remark to these beside him, as some brilliant manoruser of the corps elictical his admira-

stone, brick and mortar, combined with en gintering skill could make it. It is a truly formiduble fortress. The tower within is six or eight square surrounded by a deep trench across which are two drawbridge communicating with the outerworks. It mounts five guns, and has, buildes, extensive galleries hencuth, pierced with musket holes commanding the trenches, rivalling we should judge, in strength, the famous Redan tower of the Crimea. A brave and well provisioned garrison could hold this position against heavy odds.

The only matter of regret connected with the offuir was the probability that it would be the last fete of the season at Fort Adams, of which Col. Magrader has given sumany.

120 William Wells Brown, the well known fugitive slave, gave a free lecture on American Slavery last Sunday evening, at Narraganeett Hall, The room was well filled by an attentive audience, and the lecture gave general satisfaction.

Mn. Enron: -It is a great thing to be wise-a rare and excellent thing to be greatly wise-but a thing of doubtful if not positively mischi-vous tendency to be over-wise! Therein is a mystery, parodox, and problem of vast profundity. I have been led into it by some Jack of lantern writer in the editorial columns of one of our city the editorial columns of ane of our chy dailies, who in a scolling remark in the Tythome, gravely alleges that "the age of the Pyramide is as well known as that of the City Hall." It may be so—but I should rather like to see the man who "knows" it. Its would be a cut-osity,—and a careful execution disposite as that should rather like to see the man wee "knows" it. He would be a cut osity,—seek a vastly overvise character as that,—throwing the elder Pliny, and any quantity of learned and carnest inquirers, of all ages, completely into the shade. The proprietors of the N. Y. Times are signally fortunate in recognity the services of such a modern in securing the strates of such a modern Solomon in their columns. HAMMONTON-LANDS.

NEW ENGLAND SETTLEMENT.

RARE OPPORTUNITY.—TO ALL.
WANTING FARMS—in a healthy place, treaty-fire wife, from Philatciphis, on the Candensad Allantic railroad, New Jersey. An old estate has recently been opened for sale, and the first division of 10,000 acres divided up into farms of twenty acres and upwards. The soil is of the best quantity for the production of fruits, grains, &c. The price is \$15 to \$20 per acre, payable in easy quarter, fearly Instalments, within a term of four years, with interest. The terms are made easy, in order to insure the rapid inprovement of the land, by enabling every industribus man to buy a farm. It is now being exensively improves by good roads, and some of the best citizens from New England and the Middle States are erecting large improvements. It is a seene of the greatest improvement out of Philadelphia. Serventy five houses have been builtin four months. Practical farmers and business men from the length and breadth of the Union are settling there. It is an important business place, on account of its herigis the midst of a great market. Revery article raised upon this land finds an immediate sale. The water is excellent, and no such thing has fever in known.

The soil is a sandy or clay loam, with a clay bottoys and retenize of manures. It is free of

iale. The water is accellent, and noneclare as fever is known.

The soil is a sandy or elsy loam, with ackey botton and retenties of manures. It is free of stones and easily worked. It a sounds largely in the phosphates, and such is its fertility that from the crops produced both upon, this land and the large area adjoining under cultivation, it will be found not to be excelled anywhere in the production of crops most adapted to its market.

The reader may be well aware that the earliest and the best fruits and vegetables come from New Jersey, which are annually exported to the amount of millions of dollars. The land, besides being accessible in every way for fertilizers, has an abundant supply of the Lumber and building materials can be had on the aport at a cheap price, from the mills-gleen and briefly being started on the ground. A person, chupt in a frame teament for present corrections of one hundred dollars. On nexample, the part of the extensive underston, this is the best course to pursue in order to get a place to live in at the first. Carpenter-and buildiers are now hand to part up houses on the best terms.

In settling here the emigrant has many ad-

In setting here the emigrant has many advantages. He is within a few hours' ride of the great cities in the Middle States and New England; he is near his old friends and associations; he is in a settled country, where except improvement and comfort of civilization is at head; he is in a healthy place, and is not subject to the certainty of losing the greater partof his family and his own health by those malignant fevers which make the graves of somany millions of the young and hardy in far off regions away from home and friends. Be, sides, he has a mild climate and an open finite.

There are three trains daily to Philadelphia, and to all those who improve the railroad company gives a free ticket.

The reader will be at once struck with the advantages here presented, and ask himself why the property has not been taken in pefore. The reason is, it was never thrown in the market; and unless these statements were correct no one would be invited to examine the land before purchasing. This all are extended to the contract of the state of t

contraction they will meet persons, no doubt, from their own neighborhood; they will witness the improvements, and can judge of the character of the population. Persons should come prepared to purchase, as many are locating, and locations are not held on refeasal. The Hammonton Farmer, a monthly Literary and Agricultural sheet, containing full information of Hammonton, will be sent to each inquirer, and can be obtained at 25 ets per sanum.

Title indisputable. Warrantee decks given, clear of ult incumbrance, when perchase many is paid. Boute to the land: Lessa Vive street wharf, Ph ladelphia, for Hammonton by rail-rounded 71-2, A. Beware of all kinds of Exhiberating Cordials, as they are of no use.

To the untreability, the mere mention of the name of the far-famed and justly popular physician, Dr. Duw, that he can at all times be found at force that le is surpassed by name in euring all forms of disease however protracted, ill-treated, or mereurity affected, is a tonsolation to his patients, and an hone to himself.—Halt. Amer.

All adliced with private complaints, if possible, should consult Dr. Dow, whose nactic teducation is not surpassed by any physician in the country. In his skill, honor and integrity, all may rely with safety, while most all of the medical practitioners are without honesty or responsibility, their pretensions being grounded in ignorance and assumption.—Hepothicon Argus.

There are a great many young men whose cases have become very difficult of care, either from neglect of ill-treatment. We would advise all such to call on IIr. Dow, of Buston, whose practical experience in certain discussion don't exceeds that of any other physician in America.—Jun nul of Health.

Dr. Dow consults with physicians, as usual, on difficult chronic diseases. Charges reasonable.
